

**Dr. Duke's Phytochemical and Ethnobotanical Databases**  
**List of Chemicals for Tremorigenic**

| Chemical         | Dosage                  |
|------------------|-------------------------|
| CUACHICHICINE    | --                      |
| SAFROLE          | --                      |
| MESCALINE        | --                      |
| AFFINISINE       | --                      |
| ALPHA-IONONE     | --                      |
| DIABOLINE        | --                      |
| AFFININE         | --                      |
| YOHIMBINE        | --                      |
| COCAINE          | --                      |
| HYPERICIN        | --                      |
| PHENYLALANINE    | 1,600-12,600 mg/man/day |
| HARMALINE        | 15 ipr rat              |
| SCHELHAMMERIDINE | 25 orl dog              |
| HARMALINE        | 3 ivn rbt               |
| CONESSINE        | 500 mg/man              |
| HARMAN           | ED50=23 ipr             |
| HARMANE          | ED50=23 ipr             |
| HARMINE          | ED50=9 ipr              |
