

**Dr. Duke's Phytochemical and Ethnobotanical Database**

**Biological Activities Found in *Astragalus gummifer***

| <b>Activity</b>      | <b>Chemical Count</b> |
|----------------------|-----------------------|
| Absorbent            | 1                     |
| Acidulant            | 1                     |
| Antibacterial        | 1                     |
| Anticomplementary    | 1                     |
| Antidote (Iodine)    | 1                     |
| Antileishmanic       | 1                     |
| Antinesidioblastosic | 1                     |
| Antiotitic           | 1                     |
| Antisalmonella       | 1                     |
| Antivaginitic        | 1                     |
| Emollient            | 1                     |
| Expectorant          | 1                     |
| Fungicide            | 1                     |
| Hemostat             | 1                     |
| Immunostimulant      | 1                     |
| Interferonogenic     | 1                     |
| Keratitigenic        | 1                     |
| Mitogenic            | 1                     |

| Activity     | Chemical Count |
|--------------|----------------|
| Mucolytic    | 1              |
| Osteolytic   | 1              |
| Perfumery    | 1              |
| Pesticide    | 1              |
| Phagocytotic | 1              |
| Phytoalexin  | 1              |
| Poultice     | 1              |
| Protisticide | 1              |
| Spermicide   | 1              |
| Ulcerogenic  | 1              |
| Verrucolytic | 1              |
