

## Dr. Duke's Phytochemical and Ethnobotanical Databases

### List of Activities for Hepatoses/Liver

Name
AntiEBV
AntiHSV-1
Anticholestatic
Anticirrhotic
Anticytomegalovirus
Anticytotoxic
Antidote (Acetaminophen)
Antidote (Aluminum)
Antidote (Amanita)
Antidote (Mushroom)
Antiedemic
Antiencephalopathic
Antiendotoxic
Antifibrotic
Antihepatitic
Antihepatocarcinogenic
Antihepatotic
Antihepatotoxic
Antiherpetic
Antiinflammatory
Antileukotriene
Antileukotrienogenic
Antilipolytic
Antilipoperoxidant
Antinecrotic
Antioxidant
Antioxidant Synergist

Name
Antiperoxidant
Antiperoxidative
Antiprostaglandigenic
Antiprostaglandin
Antiradicular
Antiscorbutic
Antitriglyceride
Antivaricose
Antiviral
COX-2-Inhibitor
Cancer-Preventive
Cholagogue
Cholekinetic
Choleretic
Choline-Sparing
Cyclooxygenase-Inhibitor
Cytoprotective
Detoxicant
Free-Radical Scavenging
Glutathionergic
Glutathionigenic
Hepatoprotective
Hepatoregenerative
Hepatotonic
Hepatotropic
Immunostimulant
Interferon-Synergist

Name
Interferonogenic
Lipotropic
Lipoxygenase-Inhibitor
Membranomodulator
Methyl-Donor
Phagocytotic
Previtamin-A
Proteinogenic
RES-Activator
Tocopherol-Synergist
Triglycerolytic
Vitamin-A-Activity
